EDUCATION

Stetson University

DeLand, FL

B.S. Computer Science & Public Health, Minor in Civic Engagement

- **Honors:** Bonner Scholar (**Full Scholarship & Service Award**), Dean's List
- **Relevant Learning:** Data Structures & Algorithms, Software Development I & II, Introduction to Database Systems, Linear Algebra, Calculus

TECHNICAL SKILLS

Programming Languages: Python, Java, C#, C++, JavaScript, SQL, R, HTML/CSS, Excel VBA

Frameworks & Libraries: Django, Flask, FastAPI, React, Node.js, Bootstrap, TensorFlow, pandas, scikit-learn

Tools & Platforms: SQLite, Docker, Git, GitHub Actions, Heroku, Figma

PROJECTS

InsightPulse – Customer Feedback Analysis Platform

[GitHub](#) · [Live demo](#)

Python, FastAPI, React, scikit-learn, SQLite

- Built a **FastAPI** service and **React** dashboard for complaint classification, word contributions, low-confidence review, and human corrections stored in **SQLite**.
- Evaluated TF-IDF and transformer models on reproducible splits; retained the linear baseline after achieving **0.642 macro-F1** on an eight-class held-out test, outperforming three fine-tuned transformers.
- Added automated tests, **Docker**, and **GitHub Actions** CI; deployed the frontend on GitHub Pages and the inference API on Render.

Internship Discovery & Application Tracker

[GitHub](#) · [Live demo](#)

Python, Flask, GitHub Actions, JavaScript

- Integrated **Greenhouse**, **Lever**, **Ashby**, and **Simplify** listings with configurable screening, ranking, and a persistent review queue for daily personal use.
- Connected scheduled cloud discovery to native **macOS notifications**, a **Flask** dashboard, and email-derived application stages; published a fictional-data demo separate from private configuration and history.
- Implemented **bounded retries**, notification bookkeeping, and **atomic file writes**; added fault-injection tests for source failures, interrupted writes, and reconnection.

SHS Campus Health Dashboard

[GitHub](#) · [Live demo](#)

Python, pandas, JavaScript, HTML/CSS

- Built a **pandas pipeline** to reconcile multi-year clinic schemas, normalize dates and diagnoses, and publish aggregate counts with **small-count suppression** and automated privacy checks.
- Developed reporting used by clinic staff to review spreadsheet exports; released a standalone interactive public dashboard using **synthetic data**, with no patient records included.

Portfolio Risk Analytics

[GitHub](#) · [Live demo](#)

Python, FastAPI, pandas, SQLite, JavaScript

- Built a **FastAPI** service and interactive dashboard that cache adjusted equity prices in **SQLite** and calculate buy-and-hold returns, volatility, maximum drawdown, Sharpe ratio, and correlations.
- Validated holdings and price data, rejected interior price gaps instead of filling them, and tested financial calculations and API errors; deployed the frontend on GitHub Pages and the API on Render.

EXPERIENCE

Stetson Health Services

DeLand, FL

Intern

Jan. 2026 – May 2026

- Collaborated with clinic staff to identify reporting bottlenecks and **define requirements** for privacy-conscious reporting.
- Supported clinical operations through **data analysis**, documentation management, and patient intake.

Good Samaritan Clinic

DeLand, FL

Clinic Support Intern

Aug. 2025 – Dec. 2025

- Migrated **250+ paper-based records** into an **SQLite database**, improving access speed by **25%**.
- Developed a **Python-based system** with **automated validation checks** and audited migrated records against source documents, achieving **99% field accuracy**.

CAMPUS INVOLVEMENT

Stetson ColorStack

DeLand, FL

Technical Lead

August 2026 – Present

- Lead **coding and technical learning sessions**; research and share **industry trends and tools** to support Black and Latinx computer science students' technical and professional development.
